EDUCATION & TRAINING

2018
Diploma in Web Design and Production (Level 6)

2015
Certificate in Sport and Recreation

2014
Communication Strategies Short Course

2014
Time Management Short Course

PERSONAL SUMMARY

I am highly productive whether it be a collaborative workplace or working remotely.
My passion for web development started as an interest in UX design, it grew as I learnt more front-end languages along with the different ways to problem solve using object orientated code.
My aim is to have a strong understanding of back-end web development as I do for front-end, and eventually become a full-stack developer.

EXPERIENCE

FREELANCE WEB DEVELOPER
MOON LODGE ACCOMMODATION & ART STUDIO
Feb 2018 - May 2018

- o Efficient client interaction and communication, ensuring projects are on brief and within the set time frames
- o Created wireframes for a rough idea of the design and to present the layout to the client

PERSONAL PROJECT
WIREFRAME WEB-APP | **Feb 2018 – March 2018**

I have worked on this project for a while in my own time and started it half-way through my course. It uses JavaScript and HTML5 Canvas for its functionality. It still has a few bugs but the fundamentals are working.

STUDENT PROJECT
485 DESIGN | Mar 2018

This was a group project with three other members in my class. For the sections we had, each of us had to create wireframes for it, design it using UXPin and code it using JavaScript, JQuery, HTML5, CSS3 and Bootstrap's grid system.

HOBBIES

- Running for fun
- Attempting to learn Chinese
- Playing Chess with my wife
- Learning back-end web development
