Diploma in Web Design and Production (Level 6)

2015
Certificate in Sport and Recreation

2014
Communication Strategies Short Course

2014
Time Management Short Course

PERSONAL STATEMENT

I am highly productive whether it be a collaborative workplace or working remotely. My passion for web development started as an interest in UX design, it grew as I learnt more front-end languages along with the different ways to problem solve using object orientated code. My aim is to have a strong understanding of back-end web development as I do for front-end, and eventually become a full-stack developer.

EXPERIENCE

FREELANCE WEB DEVELOPER
The Flaming Onion | August 2019 - Current
- Efficient client interaction and communication, ensuring projects are on brief and within the set time frames
- Created wireframes for a rough idea of the design and to present the layout to the client

PERSONAL PROJECT
Personal Portfolio Website | Sep 2018 – Mar 2019
I have worked on this project for a while in my own time and started it half-way through my course. It uses JavaScript and HTML5 Canvas. I haven't felt that I have finished it as I am always improving it in minor or major ways

STUDENT PROJECT
Freelance Web Developer | Apr 2018 - Jul 2018
This was a group project with three other members in my class. For the sections we had, each of us had to create wireframes for it, design it using UXPin and code it using JavaScript, JQuery, HTML5, CSS3 and Bootstrap's grid system.

HOBBIES

- Running for fun
- Attempting to learn chinese
- Going on long drives with my wife
